BACHELOR OF COMPUTER ENGINEERING
UNED (2021- Present)

OTHERS
In addition to my university studies, I have taken several courses related to software development on educational platforms such as Coursera and Udemy.

EXPERIENCE

I have developed several software projects using strongly typed programming languages such as C# and Java. I have focused more on web development, both front-end and back-end, using frameworks like Angular and ASP.NET Core. If you want to see some of my projects and their source code, you can visit my *website* or my *github* account, whose links are at the end of this document.
